DETAILED ACTION

Restriction of Claims

1. During a telephone conversation with applicant's attorney, Sanders N. Hillis on December 7, 2004, a provisional election was made without traverse to prosecute the invention characterized by network methodology used to obtain information regarding a search or query and displaying such information using a functional index, claims 1-20. Affirmation of this election must be made by applicant in replying to this Office action. Claims 21-43 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Reasons for Allowance

2. Claims 1-20 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to teach the claims invention of a knowledge model-based index tailored to knowledge gathered specifically from a network search related to a specific upcoming meeting where such index will be displayed to a user for information selection utilizing the network and such user will be permitted to select one of the items of the knowledge model-based index.

The closest prior art (Voss et al, ACM 1999 1-58113-065-1/99/11) teaches a tool identified as "concept indexes" where highlighted passages (marked documents) are classified or linked as occurrences with all other related occurrences across the

internet. The claimed invention focuses on a specific search related to upcoming meetings request and around which model-based indexes are constructed. The proposed invention thereby improves access to knowledge to the target of upcoming meetings.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
